```
The dit selection View Go Run Terminal Help C >> Pocing College Laboration | College |
```

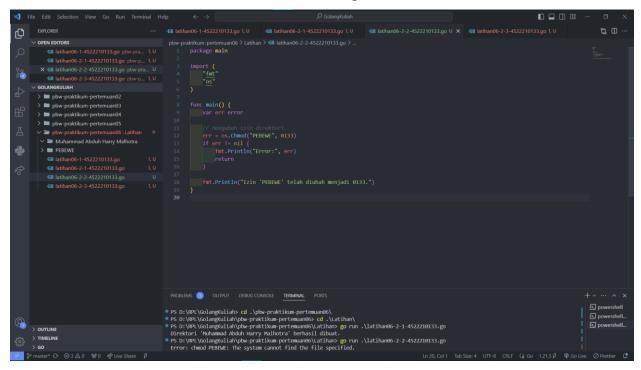

Penjelasan Latihan 1

- 1. Pada saat menjalankan/run programnya pertama kali, tidak akan memunculkan apapun karena memang sesuai yang ada pada kondisi if, jika sukses atau namanya benar akan mereturn nil (kosong)
- 2. Namun, apabila dibawah function main() bagian GetById("Malhotra") diubah menjadi kosong yaitu GetById(""), maka akan memunculkan kalimat "validation error" karena sesuai kondisinya jika kosong akan me-return ValidationError
- 3. Lalu, apabila dibawah function main() bagian GetById("Malhotra") diubah menjadi salah misal GetById("notMalhotra"), maka akan memunculkan kalimat "not found error" karena sesuai kondisinya jika bukan sama dengan "Malhotra" akan me-return NotFoundError

Penjelasan Latihan 2

- 1. Pada Latihan 2 bagian 1, ketika program dijalankan maka akan membuat direktori sesuai nama yang diisi, yaitu "Muhammad Abduh Harry Malhotra"
- 2. Pada Latihan 2 bagian 2, ketika program dijalankan maka pertama akan error karena tidak ada direktori PEBEWE, lalu setelah membuat direktori PEBEWE, maka programnya akan bisa dijalankan karena sudah ada direktori PEBEWE nya
- 3. Begitu juga dengan Latihan 2 bagian 3, karena direktori PEBEWE nya sudah ada maka program bisa dijalankan
